## Project Design Phase-II Solution Requirements (Functional & Non-functional)

| Date          | 19 October 2022             |
|---------------|-----------------------------|
| Team ID       | PNT2022TMID34987            |
| Project Name  | Car resale value prediction |
| Maximum Marks | 4 Marks                     |

## **Functional Requirements:**

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task)   |
|--------|-------------------------------|--|
| FR-1   | User Registration             | Registration through Form Registration through Gmail Registration through LinkedIN |
| FR-2   | User Confirmation             | Confirmation via Email Confirmation via OTP  |
| FR-3   | User's vehicle detail         | Manufacturing year , model , kms driven ,fuel type, registration number etc.       |

## **Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional Requirement | Description  |
|--------|----------------------------|--|
| NFR-1  | Usability                  | Simple and a friendly UI that makes a seamless interaction with user   |
| NFR-2  | Security                   | Must be a secure from SQL injection and protect from other attackers from stealing data.   |
| NFR-3  | Reliability                | A reliable source where the user details are encrypted and secured from attackers  |
| NFR-4  | Performance                | The user interface must be able to hold a reasonable amount of network traffic and have a high performance speed                                       |
| NFR-5  | Availability               | The webpage must not crash due to network traffic and must be available for user at anytime  |
| NFR-6  | Scalability                | It must be capable of moving from a smaller to a larger OS and take full advantage of the larger OS and the large number of user that could be handled |
